

Social Impact Assessment Report
On
Land Acquisition for the Purpose of Setting up
an Entry Point at 18 th Mile,
Ri Bhoi District, Meghalaya.

Meghalaya Institute Of Governance
Shillong

ABOUT MEGHALAYA INSTITUTE OF GOVERNANCE

The Meghalaya Institute of Governance was created as one of the institutional support mechanisms of the Meghalaya Basin Development Authority (MBDA) with a vision to explore, share and promote good governance in Meghalaya by assisting the government, private sector, the voluntary sector and the communities in putting good governance into practice.

In exercise of powers conferred by the Sub Section (1) of Section 4 of The Right to Fair Compensation and Transparency, Rehabilitation And Resettlement Act, 2013 (No. 30 of 2013), the Government of Meghalaya had notified the Meghalaya Institute of Governance as the State Social Impact Assessment Unit for carrying out Social Impact Assessment Study.

Publication year: April, 2018

Declaration

This final SIA and SIMP report is based on the information given by the land owner, residents and occupants of the land as well as Headman and Members of the Village Executive Committee of Umdoh village, 18th Mile, Ri Bhoi District. Maps and project details were provided by the Office of the Deputy Commissioner, Ri Bhoi District, Nongpoh.

This Social Impact Assessment and Social Impact Management Plan is the final SIA report after the Public Hearing.

Officer on Special Duty,
Meghalaya Institute of Governance,
Shillong.

EXECUTIVE SUMMARY

A Social Impact Assessment study was conducted by the Meghalaya Institute of Governance with regards to acquisition of land at 18th Mile Umdoh village measuring 60697.97 sq. m or 14.999 acres. The purpose for the land acquisition is to establish an Integrated Facilitation Centre – Entry Point to facilitate the entry of vehicles and people into Meghalaya.

The village of Umdoh is a medium sized village with a total of 147 households. It has a mixed community composed of people from the Khasi, Garo, War-Jaintia communities as well as people from other communities. It falls in the Umling C&RD Block, Ri Bhoi District. It is approximately 15 kms from the District Headquarter, Nongpoh and approximately 29 kms from the Assam – Meghalaya state border. The land to be acquired may be classified as hilly arable land. This proposed project site is on the NH -40.

The land proposed to be acquired belongs to Shri Jreit Khongjoh. On it are 5 residential structures which are occupied by him and his family members which will be demolished once the land is acquired. There are seven families whose incomes are dependent on the area to be acquired. The land is cultivated on by his children and two other households who rent a part of the land to cultivate on. A variety of fruits, vegetables and other horticultural products including beetle nut, beetle leaf, pine apple, jack fruit, pepper, banana and other fruits are grown. Apart from this there is one chicken coop and one car wash at the foothill which will be demolished once the land is acquired.

Adjacent to the land is an Anganwadi centre as well as a village footpath constructed under the MGNREGA scheme. There is also a non-

functioning water pump on the project site and 2 water sources near the project site.

During the Key Informant Interviews conducted with the land owner and his children (PAF) it was recorded that they were willing to part with the land on the condition that they would not have to enrol themselves for an Aadhar number. However, during the Public Hearing, the children of Shri Jreit Khongjoh made known that they did not want the government to acquire their land as they have no other land.

On the 20th of March 2018, a Public Hearing was held at 18th Mile Umdoh village which was chaired by Shri Aiban Swer OSD MIG. The Public Hearing was attended by more than 120 persons. During the Public Hearing a representative from the Office of the Sordar, Nongpoh Elaka pointed out that a Public Hearing had already been held for another site for the same purpose. He wanted to know why the location of the site for the Entry Point been shifted from the initial proposed site at 19th Mile to 18th Mile when the project site at 19th Mile had been accepted by the public. He also said that the NOC had not been given by the Office of the Sordar for this plot. Further, he requested that prior information be given to the Elaka before holding any other Public Hearing. While another participant in the Public Hearing also made known that the area to be acquired contains the water sources which need to be protected as they provide water to the neighbouring villages . Also, the Secretary of Umdoh village submitted to the OSD, MIG a letter with conditions for setting up the Integrated Facilitation Centre – Entry Point at 18th Mile such as the monitoring of construction workers in the proposed project. Community members who spoke during the day accepted the proposed project. The land owner Shri Jreit Khongjoh accepted the project. The occupants of the proposed project site were opposed to the land acquisition as they have no other land.

The Social Impact Management Plan prepared for this project provides for the replacement of lost residential structure through the Indira Awas Yojana Scheme to the 5 HHs who will lose their houses. It also provides for compensatory afforestation and the protection of water sources.

CHAPTER 1: INTRODUCTION

ABOUT SOCIAL IMPACT ASSESSMENT

The Social Impact Assessment process began as part of the new land acquisition act called the Right to Fair Compensation, Transparency in Land Acquisition Resettlement and Rehabilitation Act, 2013 of the Government of India. It is a people friendly, rights-based approach to development that took into consideration impacts from the loss of land, probable impacts to the wellbeing, security, sentiments of the people, impacts to the institutions present near the project site that the implementation of the government project might bring about; not just from an environmental point of view but from the social–institutional point of view.

Prior to this, land acquisition was at the behest of the requiring department. It was based on the idea of “eminent domain” wherein land was thought to be placed at the disposal of the state and land could be used in any way it saw fit without any consideration whether the acquisition of the land would be detrimental to the people who resided on or who used the land. It ignored that land acquisition for any project may also cause certain difficulties to peoples’ livelihoods, activities, social and political structure and the environment. Thus on 31st December 2014 the President of India promulgated an ordinance with the official mandate to “meet the twin objectives of farmer welfare along with expeditiously meeting the strategic and development needs of the country.”

As per the Act the state or union government can acquire land, provided it shows the “public purpose” of the project. Public purpose includes projects

related for strategic purposes such as those related to the armed forces, national security; infrastructure projects; projects for project affected families; projects which provide housing for low income groups; projects for residential purpose of the poor or landless and those displaced by natural calamities or other reasons. The underlying clause in this Act was that land acquisition could only occur if 70% of the population to be affected agrees to the land acquisition.

The new land acquisition act warrants the carrying out of a Social Impact Assessment study to ascertain whether the land acquisition would be beneficial or detrimental to the community which is a stakeholder. The Meghalaya Institute of Governance, one of the instrumental support institutions of the Meghalaya Basin Development Authority was notified as the State Nodal Social Impact Assessment Unit as per the Right to Fair Compensation, Transparency in Land Acquisition Resettlement Rehabilitation Act 2013 to conduct Social Impact Assessments.

Rigorous field level data collection exercises were conducted for this purpose. They began with a preliminary site visit to assess the project site and help in preparing a detailed TOR for the project. The next step, with the help of the acquiring body was to meet with direct stakeholders such as village durbar members as well as the land owners, residents of the village who would be indirectly affected by the land acquisition, but directly affected by the proposed project. The final step was to hold a public meeting, bringing together, the district authority, the village authority, the land owners and the village residents to air out any further grievances or thoughts on the proposed land acquisition.

The Meghalaya Institute of Governance was notified to conduct a Social Impact Assessment Study on land acquisition at 18th Mile, Ri Bhoi District for the purpose of establishing a *Facilitation Centre at the Entry Point* via Notification No.RDA.28/2017/11 dated 11th July 2017¹. The objective of the study is to prepare a complete inventory of structures, affected families and persons and to identify social impacts.

¹ See Annexure 1

INTRODUCTION TO THE PROBLEM

The concept of an Integrated Facilitation Centre – Entry and Exit Point came up as a concession to the demands of local pressure groups to set up the Inner Line Permit and thus check on the entry of unwanted elements into the state. The Integrated Facilitation Centre – Entry and Exit Point was proposed to be set up in all sensitive areas of the state to address the issues of influx in the state and illegal immigration into the state.

The objective of this study is to assess the likely impacts on the village and its residents from the setting up such a project in the site. The research team looked at both the positive as well as the negative impacts the Entry Point would bring.

OBJECTIVE OF THE PROJECT

The main objective for the proposed Integrated Facilitation Centre at the Entry point is to prevent and check the influx of the illegal entry into the State. The Entry Point will act as a facilitation centre for visitors to the state.²

PROJECT LOCATION

The site to be acquired for the project is in Umdoh village, 18th Mile, Byrnihat, Ri Bhoi District. It falls within the Umling C&RD Block. It is about 15 km to the district headquarter at Nongpoh and 29 km from the Assam-Meghalaya border.

DESCRIPTION OF PROJECT SITE

The project area measures 60697.97 sq. m or 14.999 acres more or less. It may be classified as cultivated hilly terrain. The proposed project site is cultivation land and on it is grown a variety of plantation crops. The proposed project site is connected to NH-40 on the North Western slope.

²(17 Entry/Exit Points to Be Set Up in 1st Phase 2016)

OWNERSHIP OF LAND

The area is the property of one sole individual land owner, Shri Jreit Khongjoh. On it is present a number of residential structures as well as commercial structures which are owned or occupied by relatives of Shri Jreit Khongjoh.

Table 1 Statement of Buildings

Sl. No.	Name of Owners	Type of Building	Structures Present
1.	Shri. Shaniah Paswet	RCC Building	Veranda
		Toilet	Washing Platform
		Assam Type Building (Main)	Filter
			Temporary Shed
			CC Compound
			Hut (without walling)
			Chicken coop

NEED FOR THE PROJECT

The need for the project arose out of the need to better facilitate travellers to the state and ease their entry and exit. It will also serve as a check point for illegal migrants and undocumented persons. The Facilitation centre will also act as an information centre for tourism and registration of migrant labourers.

CHAPTER 2: RESEARCH METHODOLOGY

The research strategy that the SIA-Unit used is a descriptive method. This method describes the specific behaviour or facts concerning the nature of the situation. It involves the gathering of data that describe the events; organisation, tabulation, depiction and description of the data collected.

Table 2 Date of Visit

Sl. No.		Date of Visit
1.	Reconnaissance/Preliminary Site Visit	4 th August 2017
2.	KII with Village Headman	4 th August 2017
3.	KII with Land Owner and Occupants of the land	25 th August 2017
4.	Public Hearing	20 th March 2018

PRIMARY DATA

The research team held interviews with the Headman of Umdoh village, Shri Donhok Kshiar, the Secretary of the village of Umdoh, Shri Steward Sangma on 4th August, 2017, with the land owner Shri Jreit Khongjoh, his children and their spouses who are occupants and users of the land including Shri Shaniah Paswet who is mentioned as the owner of one structure on the land proposed to be acquired on 25th August 2017. During these interactions Key Informant Interviews (KII) were conducted with them using a checklist and an open ended questionnaire. The methods used were both structured and unstructured and designed based on the likely impact on the project area.

Reconnaissance Field Survey

A preliminary site visit was first carried out on 4th August 2017. It involves identifying the likely significant impacts of the project which needs

to be investigated and also defining the approach that will be taken for their assessments to complete the initial scope of work. The Reconnaissance survey helped develop the Terms of Reference (TOR) for this SIA study.

Stakeholder Consultation

Good practice requires active consultation with relevant affected communities and other interested and affected parties. As such KIIs were held with the Village Headman and the Village Secretary and on another day, the SIA – Unit met with the land owner and the occupants and users of the land that is proposed to be acquired. The aim of these interactions is to give the respondents an opportunity to express their views on the project and its impacts so that these can be taken into account while developing mitigation impacts.

SECONDARY DATA

The research team first reviewed and researched related literature to understand the requirement and needs of the project area. Based on the review of secondary data, the team was able to get an insight on the background of the project and this has allowed for group identification and formulation of questionnaire design. Secondary data such as project details, type of investment, maps and details of land owners were obtained from the Office of the Deputy Commissioner, Ri Bhoi District, Nongpoh.

PUBLIC HEARING

A Public Hearing on the proposed land acquisition for setting up an Entry Point at Umdoh village, 18th Mile Ri Bhoi District was held on the 20th March 2018 in the village itself. Due to the notification of the Meghalaya State Assembly elections the Public Hearing was delayed till the elections concluded and the model code of conduct ended³. The Public Hearing was chaired by the OSD of MIG, Shri Aiban Swer. In attendance was Smt. V. Hynniewta, MCS, BDO Umling C&RD Block, Shri Donbok Kshiar, Village

³ Election Commission of India website Accessed from http://eci.nic.in/eci_main1/current/ImpInsEVM_13022018.pdf

Headman of Umdoh village, the land owner Shri Jreit Khongjoh and members of the Village Executive Council and the residents of Umdoh village.

DATA PROCESSING AND ANALYSIS

Data collected during the field visits have been systematically arranged and qualitatively interpreted.

CHAPTER 3: FINDINGS FROM RECONNAISSANCE

The village of Umdoh is under the Umling C&RD Block, Ri Bhoi District, Meghalaya. The village of Umdoh is composed of a mixed tribal community of Khasi, Bhoi, Garo, War-Jaintia and other communities.

Figure 1 Residential Structure in the Project Site

DEMOGRAPHIC PROFILE OF UMDOH VILLAGE

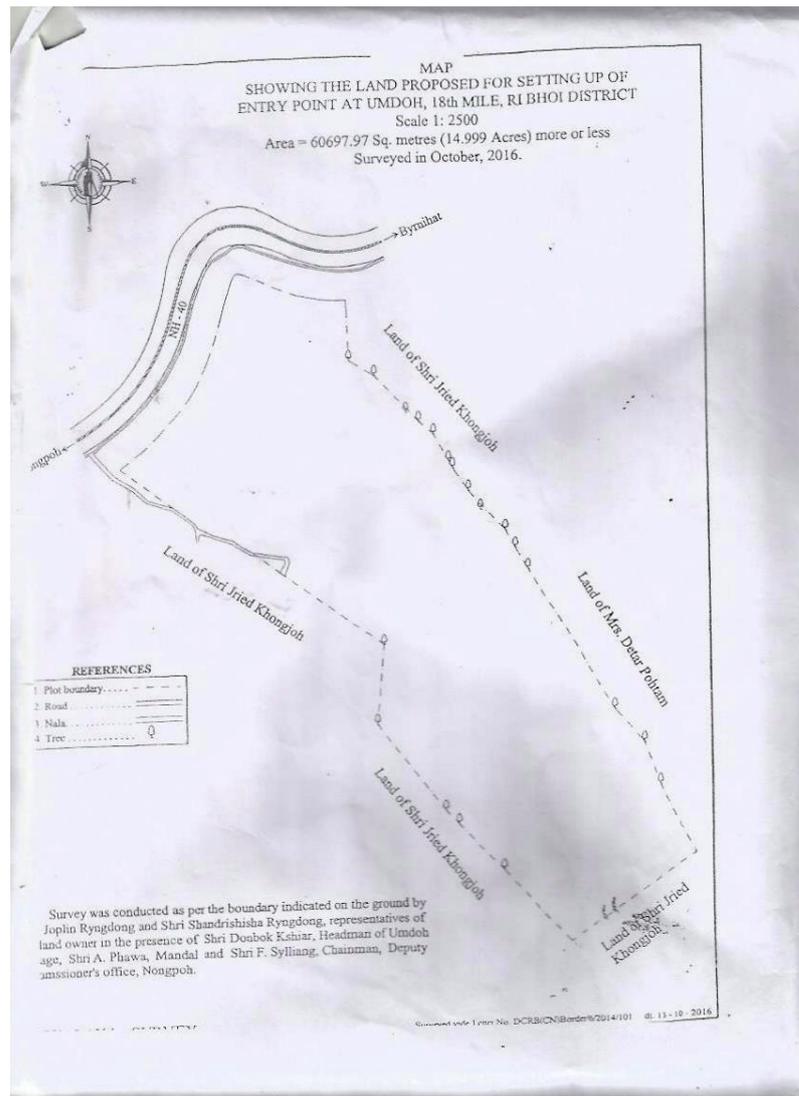

Umdoh is a medium sized village with a total of 147 households. It has a mixed community with people belonging to the Khasi, Garo, War-Jaintia communities as well as other communities. The following table is the demographic profile of the village of Umdoh 18th Mile, Ri Bhoi District as obtained via the Census of India 2011.

Table 3 Demographic Profile of Umdoh 18th Mile Village

Sl. No.	Heading	Total Population
1.	Total Population	707
2.	Total Male Population	369
3.	Total Female Population	338
4.	Total ST Population	703
5.	Total Male ST Population	366
6.	Total Female ST Population	337
7.	Total Literate Population	505
8.	Total Male Literate Population	263
9.	Total Female Literate Population	242
10.	Total Illiterate Population	202
11.	Total Male Illiterate Population	106
12.	Total Female Illiterate Population	96

LAND ASSESSMENT FROM RECONNAISSANCE/PRELIMINARY SITE VISIT

Figure 2 Map Showing the Land Proposed for Setting Up of Entry Point at Umdoh, 18th Mile, Ri Bhoi District

During the KII with the occupants and users of the land to be acquired, the following information was derived.

Figure 3 Footpath Constructed under the MGNREGA Scheme which is adjacent to the Project Site

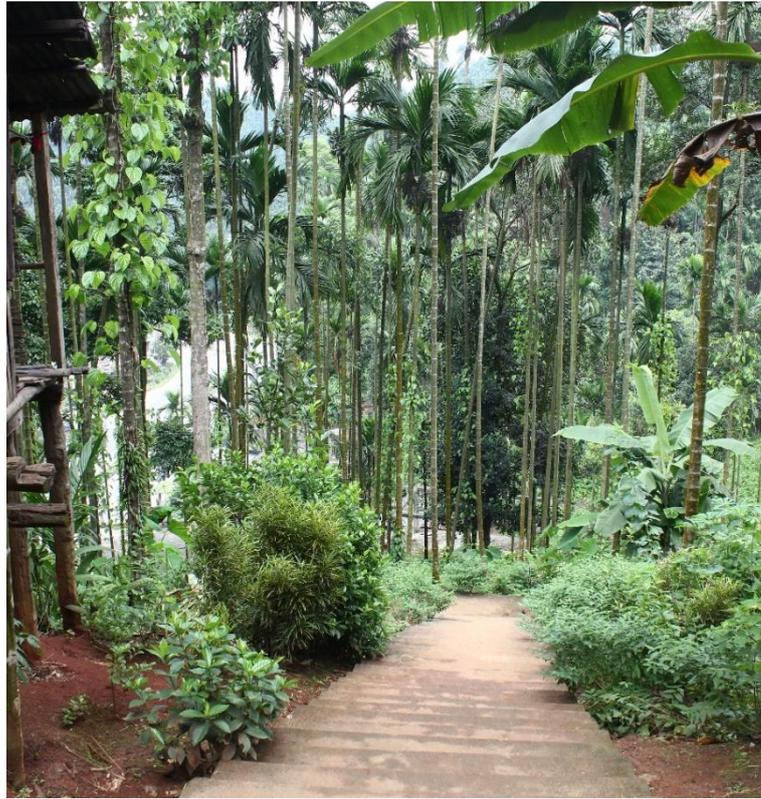

Table 4 Preliminary Land Assessment

Sl. No.	Issue	Finding/Remark
1.	Typology of land	Hilly
2.	Ownership of Site	Community and Private Property
3.	Usage of Land	Cultivation
4.	Location of Land	NH-40 on the GS Road at 18 th Mile, Umdoh Village
5.	Type of crops cultivated, if any:	<ul style="list-style-type: none"> • Beetlenut/Arecanut • Beetle leaf • Jack fruit • Oranges • Papaya • Banana • Chilli • Pepper • Yam • Bay Leaf

		<ul style="list-style-type: none"> • Pineapple • Turmeric • Jackfruit • Litchi • Tamarind • Mango • Other horticultural products
	Water Sources, if any	<ul style="list-style-type: none"> • Water source near Smt. Detar Pohtam's land • Spring on Shri Jreit Khongjoh's land.
	Economic Activity	<ul style="list-style-type: none"> • Agricultural activities • Car wash on the north-western slope of the hill.

CHAPTER 4: STAKEHOLDER CONSULTATION

Interviews were conducted with some stakeholders related to the project. The following were discussed:

INTERACTION WITH THE VILLAGE HEADMAN AND THE MEMBERS OF THE VILLAGE EXECUTIVE COMMITTEE

During a brief interaction with the village headman Shri Donbok Kshiar and Shri. S. T. Sangma a member of the village executive committee on 4th August, 2017 an assessment on possible impacts from the land acquisition was done on the social institutions present, etc.

Figure 4 Non-functioning Water Pump on Project Site

Table 5 Preliminary Assessment of Possible Impacts

		Pucca	Semi – Pucca	Kutchha	Impacted	Type of Impact	
Structures	Residential	2	5	0	Yes	Total demolition	
	Commercial	1	0	0	Yes	Car wash will be impacted	
	Community Infrastructures	0	0	0	Yes	Footpath and Hand pump at the edge of the project site will be impacted	
	Primary School	0	0	0	No	None	
	Secondary School	0	0	0	No	None	
	Higher Education	0	0	0	No	None	
	Police station	0	0	0	No	None	
	Anganwadi Centre	1	0	0	Negligible	The Anganwadi Centre is adjacent to the project site and may be impacted during the construction period	
	Healthcare	1	0	0	Negligible	There is a clinic nearby the proposed project site.	
	Religious Institutions	0	0	0	No	None	
	Traditional/ Customary Institutions	0	0	0	No	None	
	Community Resources	Road			Yes	Yes	The village footpath constructed as part of the NREGA will be impacted

	Source of Drinking Water			Yes	Yes	Non-working Hand pump will be impacted
	Access to timber				Yes	
	Electricity				6	There are 6 electricity poles which may be impacted once the land is acquired for this proposed project.

The acquisition of the land to the community would mean:-

- a. Loss of MNREGA village footpath
- b. Loss of community hand pump.

INTERACTION WITH LAND OWNER SHRI. JREIT KHONGJOH

A KII was held with the land owner Shri. Jreit Khongjoh on 25th August 2017 at his residence in Umdoh. Shri Jreit Khongjoh belongs to the ST (Khasi) community and aged about 77 years old. He had bought the land in 1982⁴. Shri Khongjoh has 8 adult children who are all occupants and users of the proposed project site. Shri Khongjoh used to be a n agriculturalist.

⁴ See Annexure 2

Figure 5 KII with Shri JreitKhongjoh and his children

This land had been divided between his children to cultivate and reside on. There are also 7 residential structures on the area proposed to be acquired. Apart from them, he had rented out part of the land to 2 individuals to cultivate upon.

To Shri Jreit Khongjoh, the loss of this land would mean a loss of:-

- a. Agricultural land
- b. Loss of agricultural produce
- c. Loss of rent.
- d. Loss of residence.

Shri Jreit Khongjoh is willing to give his land if he does not have to apply for an Aadhar number.

Figure 6 Interaction with Occupants of Land

INTERACTION WITH OCCUPANTS OF LAND

Key Informant Interviews with some of the occupants of the land on the 25th August 2017. The following were the people who were consulted.⁵

Table 6 Data Collected from KII with Occupants of Land on the 25-08-17

Sl No.	Name of Occupant	Sex	Age	Main Occupation	Relation to Land Owner	Usage of Land	Struct on Land	Utilities on land	Agricultural products on land	Animal Husbandry	No. of Dependents	Income from Land	Need to Relocate	Aspirations from land acquisition	Concerns from the land acquisition
1.	Probin Rvndong	M	32	Farmer	Son	Agriculture	-	Electric Pole Dug Well Pond	Beetlenut Fruit Beetle Leaf Jackfruit	-	4	NA	Yes	The agreement of all concerned	-
2.	Joplin Ryndong	M	42	Farmer	Son	Agriculture	-	-	Pineapple Beetlenut Beetle Leaf Pepper Banana Jackfruit	-	8	80,000	Yes	Fair monetary compensation	-

⁵ See Annexure 4

								Papaya Litchi							
3.	Aitngen Khongjoh	F	40	Farmer	-	Agricu lture and Anima l Husba ndry	Chicke n Coop Toilet	Electric Pole	Beetlenut Beetle Leaf Banana	40 hens	7	<2000/p m	Yes	Employe nt after land acquisition Relocation near this area	Concerns during the relocation process
4.	Krisphida Khongmalai	F	25	Home maker	Daughter in law	-	Reside nce (Thatc hed)		Beetleleaf		4	60,000	Yes		Don't want to register for Aadhar number No other place tp stay
5.	Shaniah Pohs wett	M	40	Agricult ure	Son in law	Agricu lture and Reside	RCC House	Water Tap Water Tank	Beetle Leaf Jackfruit Coconut Banana	-	4	<300,00 0 per year	Yes	Fair compensati on Employe	-

The interaction with most of the respondents showed that most of the respondents would have to be relocated as their residences (either partially or totally) would have to be demolished. These respondents are mainly agriculturalists and their incomes are dependent on the land.

Another occupant of the land Shanrishisha who owns a car wash at the foot hills could not be contacted.

CHAPTER 5: MAJOR FINDINGS

The following chapter discusses the main findings from the field study that the SIA-Unit collected through its own observations and through interactions with different stakeholders:

TYPE OF LAND

The land proposed to be acquired is agricultural land. It is on a hilly slope.

LAND OWNERSHIP

The land proposed to be acquired belongs to one individual Shri Jreit Khongjoh who bought the land in 1982⁶.

USE AND ACCESS TO LAND

The land which is mainly agricultural land is used by the land owners' immediate family as well as by his extended family to cultivate on and to also reside on. Apart from this, Shri Jreit Khongjoh's land is given on rent to two individuals to cultivate on.

On a portion of his land adjacent to the local primary school is a community footpath built through the MGNREGA scheme. On it also is a hand pump which is no longer used as it has dried up.

PROJECT AFFECTED FAMILIES

There are a number of families that are likely to be impacted. Apart from Shri Jreit Khongjoh's family there are a number of other families also likely to be impacted from this land acquisition such as his children who reside on the land and also cultivate on it. There are about five of these families. There are also two families who are likely to be impacted from this

⁶ See Annexure 2

land acquisition as they use the land to cultivate on and their income comes from it.

Another family to be affected is the one belonging to Shanrishisha who runs a car wash on the foothill of the land to be acquired.

From the Public Hearing it was learnt that while the land owner Shri Jreit Khongjoh was willing to accept the offer for land acquisition, his family who would be directly affected by the same land acquisition were opposed to it.

STRUCTURES TO BE AFFECTED

There are a number of structures to be affected. There are 7 residences both kutchra and pucca to be affected. There is also a chicken coop which will be impacted from the land acquisition. These structures will be completely demolished after the land acquisition.

ALTERNATE PLACE FOR THE PROJECT

This area is well suited to the need of the project.

ROADS AND TRANSPORT

The project site is located on NH-40. It is important to stress at this point the necessity and importance of this road as the lifeline of the state. This road is an arterial road for the state of Meghalaya. It forms one of Meghalaya's only connection to the other North-Eastern states through Assam and to the rest of India. This road is the main route for vehicles carrying food supplies, petroleum and all other goods to the state of Meghalaya.

The smooth flow and safety of traffic plying on this road is a strict priority during all project phases. As this road serves as the main point of entry and exit into the state, the integrity of the road condition must be a priority.

WATER SOURCES

There are about two water sources near the project site. On the land of Smt. Detam Pohtam on the south east boundary of this plot of land to be

acquired there is one spring. Another spring can be found on the southern part of this project site on the land of Shri. Jreit Khongjoh.

Apart from this, there is a non-working hand pump on the project site itself.

CHILDREN AND WOMEN

The proposed land acquisition will affect female agriculturalists who cultivate on the land. Most of these would be the daughters of Shri. Jreit Khongjoh. This land acquisition is a cause of concern for one female respondent during the KII as she is a home maker and the daughter in law of Shri. Jreit Khongjoh, she is wary of the possibility of having to relocate after the land acquisition. Other respondents who are wary of having to relocate require that the place they are relocated to is close to the present project site.

As there is a school near to the project site which provides ICDS schemes to local children, there might be slight disturbance during the construction phase. As the land proposed to be acquired is on a higher elevation than the school, there may be some loose soil that can impact the school.

PLACES OF RELIGIOUS AND CULTURAL IMPORTANCE

There are no places of religious, cultural importance near the land proposed to be acquired.

SAFETY, CRIME AND VIOLENCE

The village of Umdoh has no safety concerns at present.

The respondents were only hopeful that with the coming of the Facilitation Centre - Entry Point there would be more streetlights installed which would increase the safety of village residents.

FOOD SECURITY

The proposed land acquisition would affect mostly agriculturalist and agricultural land. The main agricultural products cultivated on the project site are plantation crops like beetle nut, beetle leaf, pineapple, bay leaf and

other horticultural products. The acquisition may not affect the food security of the people directly however, the loss of cultivable land and a viable income may negatively affect food security.

AFFECTED OR VULNERABLE GROUPS

All of the affected households from the proposed land acquisition belong to the Scheduled Tribe (Khasi) community.

ECONOMIC AND LIVELIHOOD ACTIVITIES.

The economic and livelihood activities of the community would be disrupted due to this land acquisition. Shri Jreit Khongjoh and his children would lose viable agricultural land which forms a significant part of their household income. Apart from this, Shanrishisha would lose income from the loss of the car wash.

Table 7 Comparative Analysis of Positive and Negative Impact

S. No	Issue	Positive Impact			Negative Impact			Remarks
		Pre-Construction	Construction	Operation	Pre-Construction	Construction	Operation	
1.	Use & Access to Land	-	-	-	Loss of cultivated land.	-	-	Loss of cultivated land.
2.	Project Affected Persons	Fair Compensation	Employment during construction phase	Employment to family members.	Loss of income	-	-	With the loss of land there would be a loss of income from agriculture and whatever other economic activity in the land proposed to be acquired. However, with Fair compensation and the possibility of gaining employment during the construction and operation phases are the positive impacts.
3.	Structures	-	-	Possibility for compensate land owners to build better residential houses	Loss of 7 residential houses, chicken coops and a car wash	-	Inability to replace lost residential structures due to lack of money	In total there would be 7 residential houses, chicken coops, and one car wash that would have to be demolished. The lost structures should be compensated for taking full cognizance of relevant sections of the Act.

4.	Roads and Transport	-	-	More streetlights.	-	<ul style="list-style-type: none"> • Damage and loss of the village footpath along the edge of the proposed project site. • Damage to NH40 the main lifeline of the state. 	-	During the construction phase NH-40 may be disturbed and there may be traffic snarls that would disturb the smooth flow of cars.
5.	Water	-	-	Better access to PHE water	-	Damage to community well and to the two springs near the proposed project site.	-	The disturbance to the water sources during the construction phase is a strong possibility. As such water bodies already present must be protected and harvested to ensure their full potential.
6.	Grazing	-	-	-	-	Loss of a small	-	The land is not used as grazing land, however

	Land					portion of animal husbandry activities, such as poultry rearing.		a user of the land rears poultry.
7.	Electricity Supply	-	-	-	-	Disturbance to electricity supply to Umdoh village and other adjoining villages nearby as the electricity poles present at the edge of the proposed project site.	-	
8.	Health Care Facilities	-	-	-	The Anganwadi Centre adjacent to the	-	-	

					project site would be disturbed during the construction phase of the project. Which may hinder the services it provides to the expectant and nursing mothers, adolescent girls and children.			
9.	Educational Institutions	-	-	-	-	-	-	-
10	Women & Children	-	Employment to women	Safer environment for	Loss of income and residential	Pollution that may adversely affect women	-	

				women and children	property to women	and children's health.		
11.	Vulnerable Communities	-	-	-	Loss to Scheduled Tribe (Khasi, Garo and Jaintia) communities	-	-	
13.	Places of Worship	-	-	-	-	-	-	
14.	Cremation/Burial Grounds	-	-	-	-	-	-	
15.	Safety, Crime and Violence	-	-	Safer environments to communities residing in the adjoining villages	Safety concerns during construction such as soil erosion, destruction of property boundaries.			
16.	Places of	-	-	-	-	-	-	-

	Cultural Meaning							
17.	Food Security	-	-	-	The Anganwadi Centre adjacent to the project site would be affected during construction phase.			
18.	Common Property Resources	-	-	-	Destruction/hindrance to CPRs such as the two water sources found at the boundary of the project site proposed to be acquired.	-	-	
19.	Markets	-	-	-	-	-	-	-
20.	Tourism	-	-	The state of				

				Meghalaya may be able to obtain better data on the entry of tourists to the state and therefore				
21.	Employment	-	Employment opportunities during construction period for residents of Umdoh village and other surrounding villages.	Employment opportunities for directly affected persons, as well as other indirectly affected persons once the	Loss of employment for people employed with the land owners as (seasonal) agricultural workers. Loss of employment for people employed with the car wash.	-	-	There is a possibility of employment and income loss after the acquisition of the land. While on the other hand, there is a possibility that employment opportunities may grow once the construction of the project begins. As too during the operative phase of the project, employment may arise to look after the day –to-day activities of the project.

				project is installed in the village.				
22.	Income Levels	Monetary compensation to directly affected persons	Income from employment during the construction phase.	Increase in income levels for those who have got employment in the Entry Point Project. Income may also go up for other economic activities that may come up such as shops and tea stalls.	Initial loss of income due to the loss of agricultural land.			

CHAPTER 6: PUBLIC HEARING

Figure 7 Public Hearing on the 20th March 2018

A Public Hearing on the proposed land acquisition for setting up an Entry Point at Umdoh village, 18th Mile Ri Bhoi District was held on the 20th March 2018 in the village itself. As the Meghalaya State Assembly elections were declared by the Election Commission of India the holding of the Public Hearing was put on hold till after⁷. The Public Hearing was chaired by the OSD of MIG, Shri Aiban Swer. In attendance was Smt. V. Hynniewta, MCS, BDO Umling C&RD Block, Shri Donbok Kshiar, Village Headman of Umdoh village, the land owner Shri Jreit Khongjoh and members of the Village Executive Council and the residents of Umdoh village.

The following are the discussion, opinions and view made by the community members:

⁷ Election Commission of India http://eci.nic.in/eci_main1/current/ImpInsEVM_13022018.pdf

Figure 8 Public Hearing on 20th March 2018

Shri Stanley Roy Syngkli,

*Myntri Rangbah,
Secretary and Sordar
under Nongpoh*

Sordarship said that no prior information was given to the Sordar on the change in proposed project location from 19th Mile, Ri Bhoi to 18th Mile, Ri Bhoi. He also asked that

the government should share the final decision made by the government on 19th Mile so that the people are aware why 18th Mile is chosen from the proposed land acquisition for setting up of an Entry Point.

Response: The Chairman of the meeting clarified that Meghalaya Institute of Governance has been notified as a nodal agency to conduct Social Impact Assessment Study only while Land acquisition is solely based on the Revenue Branch, Ri Bhoi.

Shri S. Mawiong resident of 18th Mile said that the government has brought a lot of development and such development in the village is welcome by the people. He is thankful to the land owner for being so generous to give his land for development. He asked if local youth can be given employment opportunity especially for the educated ones.

Figure 9 Public Hearing on 20th March 2018

Response: The chairman said that not only educated young people will be employed but people with capabilities and willingness to work will be employed during the project construction and implementation phase.

Shri T. Syngkli resident of 18th Mile said that there were too many Public hearing held on Entry Point but so far no working process has been witnessed. He also said that during the project construction the drinking water source near the project location should be taken into consideration.

Figure 10 Public Hearing on 20th March 2018

Response: The Chairman said that only after the government makes a final decision on which land will be acquired then only the work will be processed in the selected land.

Shri. Frankly Syngkli resident

Figure 11 Public Hearing on 20th March 2018

of 18th Mile said that the Entry and Exit Point is a good initiative taken by the government for developmental purpose but what is disappointing is many time employment opportunity are taken away from the local people. Another thing is no

information was given to the Dorbar Raid and Dorbar Hima. If all the Dorbar were informed at each level, decision can be made collectively.

Response: The chairman said that the government will see that the Hima, Riad and ADC are informed about the land acquisition. However we should remember that the Hearing today is for Social Impact Assessment.

Figure 12 Public Hearing on 20th March 2018

Assistant Secretary of

18th Mile Village Durbar

has given a letter of agreements to the Meghalaya Institute of Governance if the proposed land acquisition is approved in 18th Mile. (Annexure 7) Some of the agreements are that the Dorbar will provide a No

Objection Certificate to the department acquiring the land in 18th Mile; Priority should be given to the local people for employment; all employees under the proposed project will be registered under the Dorbar Shnong; No outsiders are to be employed without prior knowledge from the village etc.

Smt. Ryndong, eldest

Figure 13 Public Hearing on 20th March 2018

daughter of the Landowner said that giving away ones land for development is a generous act however she requested the government that Land acquisition for the proposed Entry point at 18th Mile be shifted to 19th Mile as the family needs the land for their livelihood activity.

Smt. Sarah Ryndong, wife of the landowner said that she wants to give the land for the proposed acquisition of Entry Point in 18th Mile but her children are against the acquisition.

Figure 14 Public Hearing on 20th March 2018

The Public Hearing was concluded by Shri Aiban Swer after the representations from the stakeholders, including the land owner and his family as well as representations from the Dorbar of the Elaka of Nongpoh and from the village members themselves. The Village Dorbar of 18th Mile also submitted their points on the conduct of the Entry Point at 18th Mile Village.

CHAPTER 7: SOCIAL IMPACT MITIGATION PLAN

The Meghalaya Institute of Governance which is the state nodal SIA unit is pleased to present herewith the Social Impact Mitigation Plan which has been prepared to mitigate negative social impacts that may arise out of the proposed land acquisition to establish an Integrated Facilitation Centre – Entry Point according to the RTFCLARR Act, 2013. The SIMP consists of a set of mitigation, monitoring and institutional measures to be taken up during the design, construction and implementation phases of the project to reduce adverse social impacts during the various stages of the project.

SUMMARY OF FINDINGS

- The area proposed to be acquired is a hill
- The area proposed to be acquired is agricultural land
- The area proposed to be acquired belongs to only one land owner
- There are 7 families whose income is dependent on the area proposed to be acquired.
- There are 5 residential structures on the land proposed to be acquired that will have to be demolished once the land is acquired.
- There is 1 chicken coop on the land proposed to be acquired that will have to be demolished once the land is acquired.
- There is 1 car wash on the North – Western foothill of the land proposed to be acquired that will be disturbed during the land acquisition process.
- There is a community footpath on the edge/boundary of the land proposed to be acquired

- There is a non-functioning water pump on the land proposed to be acquired.
- There is an Anganwadi centre bordering the land proposed to be acquired.
- There are 2 water sources near the land proposed to be acquired.
- The land owner and his extended family (who are users of the land) are willing to give the land on the condition that they do not have to enrol themselves for the Aadhar card.
- The land owner requests that employment opportunities be given to his family members once the project is in operation.
- The land owner is willing to cede with his land.
- The directly affected persons from this land acquisition opposed to the land acquisition and requested that the site for the Entry Point be shifted elsewhere.

Table 8 Analysis of Social Impact

Type of Impact		
	Negative	Positive
Agriculture	Loss of agricultural land and produce	Nil
Livelihoods	Loss of livelihoods for agriculturalists, the owner of the car wash.	<ul style="list-style-type: none"> • Possibility of gaining employment in the project to be installed. • Possibility of gaining income through small enterprises/petty shops set up near the project site.
Trees	Loss of plantation trees.	Planting of trees in the project site to negate the air pollution from the traffic.
Structure	There will be a loss of 5 residential structures. There may be some disturbance to structures present near the project site such as the Anganwadi Centre.	Nil

Water	Disturbance to the two sources of water near the land proposed to be acquired.	Better access to PHE water for the village as a whole.
Electricity supply	Nil	Nil
Health	Nil	Nil
Road	Disturbance to NH-44 during construction period	Nil
Miscellaneous	There is some concern regarding the enrolment for an Aadhar number.	

MEASURES TO AVOID, MITIGATE AND COMPENSATE IMPACT

RESETTLEMENT MEASURES

- i. As per Section 8 of the RTFCLARR Act 2013 the Rehabilitation Commissioner shall publish the approved Rehabilitation and Resettlement Scheme by affixing it in conspicuous places in the affected areas.
- ii. As per Section 101 of the RTFCLARR Act 2013 when any land acquired under the Act remains unutilised for a period of five years, it shall be returned to the legal owners or the legal heirs.
- iii. As there will be 5 households whose residential structures will be demolished during the construction of the project, proper resettlement plans need to be put in place.
- iv. As per Section 41 (6) as the land shall be acquired from a Scheduled Tribe family, one-third of the compensation amount due should be paid to the affected family as first instalment. This would be extremely useful to help these families who will lose their residential structures to construct another residential structure.

- v. Replacement of lost residences by giving affected households a constructed house as per the Indira Awas Yojana⁸ scheme or the equivalent cost of a house may be offered in lieu of the constructed house. Each affected family will not get more than one house under the provisions of this Act.

REHABILITATION MEASURES

- i. Even though this is a tribal dominated area there is no need to put forth a Development Plan for Scheduled Tribe families as per Section 9 of the RTFCLARR Act 2013 by the Requiring Body as it does not involve *involuntary displacement* of the tribal families.
- ii. Shri Jreit Khongjoh the legal land owner of the land may be compensated as per the First Schedule of the RTFCLARR Act 2013. This may include the:
 - Market Value of land as determined under Section 26
 - Factor by which the market value is to be multiplied in rural areas
 - The value of assets attached to the property.
 - Solatium, i.e. an award for inconvenience, loss or the like.
- iii. The Second Schedule of the Act is applicable to all affected families and compensation may be paid as per it. This includes
- iv. If any affected household has been reduced to the status of a marginal farmer on landless, they shall be allotted a minimum one acre of land in the command area.
- v. When jobs are created through the project, suitable training and skill development should be given so as to ensure employment at a rate not lower than the minimum wages; or ;
- vi. One-time payment of five lakhs per affected families or Annuity policies that shall pay not less than two thousand rupees per month per family for twenty years.

⁸ Applicable to all who have lost residences provided that they have lived on the land for a period of more than 3 years preceding the date of notification.

- vii. Each affected families should be given monthly subsistence allowance for a period of one year. As they are ST displace from schedule area, another fifty thousand rupees is to be paid.
- viii. Each affected families shall be given a onetime financial assistance for transportation cost. They shall also be granted a one-time resettlement allowance.
- ix. The family who has a chicken coop on the project site shall get a onetime financial assistance for the coop.

SOCIAL MEASURES

- i. The affected families should be resettled preferably in the same Scheduled Area in a compact block so that they may retain their ethnic, linguistic and cultural identity (Section 41 (7) of RTFCLARR Act, 2013).
- ii. Adherence to the conditions put forward by the Village's Executive Committee with regards to:
 - o Employment to residents of the village during the construction and operation phase of the project.
 - o Prior information to the Village Executive Committee before new staff are deputed to the Entry Point.

ENVIRONMENTAL MEASURES

- i. Under the Forest (Conservation) Act, 1980 Chapter 3 Section 3.1(i) compensatory afforestation must be made for the loss of all trees in the area.
- ii. Trees should be planted to reduce the pollution caused during construction and implementation of the project.
- iii. Protection of the water sources at the project site so as to protect it from pollution during the construction period and thereby enable its use during the operation phase of the project.

MISCELLANEOUS

- i. Any disputes between the stakeholders regarding land ownership should be resolved first and made sure compensation is given to the legal owner.

- ii. Adequate measures should be placed to address unforeseen negative impacts. Institutional measures like proper Grievance Redress Mechanism (GRM) cell may be installed and a notified Grievance Redress Officer (GRO)
- iii. It is highly recommended that the desire of the community be taken into consideration and their written representation be followed.

Rehabilitation and Resettlement Committee

Although Section 45(1) of the RTFCLARR Act 2013 puts provision for the establishment of a Resettlement and Rehabilitation Committee only when the area of land to be acquired is more than one hundred acres, it may be suitable to constitute a similar body to see, review and monitor the progress of rehabilitation and resettlement once in a month till the process of rehabilitation and resettlement is completed. This Committee is also set up for the purposed of carrying the post-implementation social audits and grievance redress.

ADDENDUM

The Meghalaya Institute of Governance received two representations from the Office of the Sordar, Nongpoh Elaka as well as the community members of the 19th Mile Village after the Public Hearing on the 20th March, 2018.

The Office of the Sordar, Nongpoh Elaka⁹ stated that the Elaka had not given a NOC to the proposed acquisition of the land in 18th Mile while it had given its NOC to the land acquisition in 19th Mile Pahammawlein village. It further stated on the village of 18th Mile being a valuable catchment area to the neighbouring villages. It was also opposed to the project as the Headman of 18th Mile, Umdoh village had never received a *sanad* from the Sordar. Thus, the Office of the Sordar opposed the project as it was not in accordance to the customs and ways of functioning of the Elaka.

The second letter received¹⁰ stressed the peoples' opposition to the proposed land acquisition in the 18th Mile, Umdoh village by the people of 18th, 19th and 20th Mile as they had already agreed upon setting up of the Integrated Facilitation Centre – Entry Point in 19th Mile. It further stated that 18th Mile is the only catchment area with many natural streams and springs which feed the River Umtru. Therefore the disturbance of such a fragile eco system may become extremely detrimental in the long run.

Annexure 9. Letter from 20th Mile, Ri Bhoi District Opposing the Setting Up of Integrated Facilitation Centre – Entry Point at 18th Mile

but not 23/18

4

To,
The Director
The Meghalaya Institute of Governance
Shillong, Meghalaya.

Date: 20.03.2018

Subject:- Opposition to setting up of Entry Point in Umdoh Village, 18th Mile, Ri Bhoi District.

Sir,

With reference to the subject mentioned above we the residents of 18th, 19th and 20th Mile, Ri Bhoi District, strongly object to the proposal of setting up of Entry Point (Facilitation Centre) in Umdoh Village 18th Mile, since we have collectively approved the setting up of such a centre in 19th Mile, Ri Bhoi District, already.

It maybe stated that the people of the above areas have already given their unanimous collective consent, in the Social Impact Assessment (Public Hearing) conducted by your Department in 19th Mile, so we fail to understand the need for another site, for setting up the Entry Point.

Further, we wish to draw your attention to the fact that the terrain in 17th, 18th and 19th Mile are entirely hilly and rocky in nature. The only vital water catchment area for the entire stretch lies in Umdoh Village 18th Mile, the very site which is currently being proposed for the Entry Point.

It may be pointed out that there are natural springs and a stream, in the proposed site, which in turn supports a thriving ecosystem with thick vegetation, and both flora and fauna flourish in this site. The soil in the proposed site is fertile and part of it is also used for agriculture and plantation.

The mentioned stream which passes through the site feeds the Umtru river and it is imperative that all efforts are made to conserve it, for present and future generations.

In view of the above and in the interest of conserving a significant catchment area, protecting our dwindling precious water resources and for the sake of maintaining the ecological balance of the areas surrounding the proposed site, we the undersigned the inhabitants of 18th, 19th and 20th Mile firmly oppose the setting up of the Entry Point in 18th Mile, Umdoh Village.

Thanking you

Yours Faithfully
